Total Recall

Software application with reporting tools to manage test data from the Alco-Sensor® IV with memory and versions of the Alco-Sensor FST®

Total Recall is a Windows® application designed for collecting and compiling test data from Alco-Sensor IV with memory and certain versions of the Alco-Sensor FST. The software presents simple to follow, step-by-step instructions which lead the operator through the instrument result download process. Once the data is downloaded, reporting tools included within the software package allow the data to be queried, sorted, and printed or exported in a variety of report formats.

Total Recall collects and stores results from tests previously run on your instrument. The software will accept downloads from any number of memory instruments. The query feature within the database allows the user to search through the stored data, identify records, and generate reports. Reports are generated based on the selection criteria established by the user.

Alco-Sensor® IV Total Recall

Software application with reporting tools to manage test data from the Alco-Sensor IV with memory and versions of Alco-Sensor FST

Data Storage

Total Recall stores the downloaded test results to a queryable database from which results may be reprinted and reports generated.

Printout Capability

Test results and reports can be printed by using laser and inkjet printers supported by Microsoft Windows®.

Data Collection

Total Recall allows identifying information to be added to test records to facilitate later searching or reporting.

Backup

Total Recall can create backup sets of data and will automatically remind the user to maintain and update those backups.

Communications (optional)

The software will operate as a standalone system or as part of a defined networked system. Networking multiple Total Recall installations to a centralized database can be accomplished with IntoxNet, an Intoximeters central database program (purchased separately). Total Recall systems can be interfaced with IntoxNet via modem or network/internet connection, when used with Alco-Sensor IV with memory.

PC Operating System

Microsoft Windows 10®, Windows 7®, or Windows Vista®

CPU, Available Hard Disk Space

Requirements do not exceed the minimum system requirements of the underlying Microsoft Windows® operating system.

Serial or USB Port

An available 9-pin serial or USB port for connecting the PC with the Alco-Sensor IV with memory is required. When using a USB port, a supported USB to serial adapter is required (included with package).

Communications (Cable)

Total Recall comes equipped with a 9-pin serial interface cable for the Alco-Sensor IV with memory.

Printer (optional)

Total Recall may optionally be used with laser and inkjet printers supported by Microsoft Windows® to print reports.
