BETTER PROTECTION AGAINST DRUGGED DRIVING

Driving under the influence of drugs (DUID) is a major concern of police forces in the United States and around the globe. Previously, the only accurate drug testing required sending urine or blood samples to a laboratory — which could delay results for days.

### PORTABLE, HANDHELD AND CONVENIENT

The SoToxa™ Oral Fluid Mobile Test System is a handheld analyzer that provides the optimal combination of speed, ease of use, reliability and accuracy. The analyzer has been designed to meet the high performance demands of law enforcement, empowering officers to take action with immediate test results.

It can detect up to 6 drug classes within 5 minutes from a single oral fluid collection sample. Weighing in at under 2 lb and fitting comfortably in your hand, it is a truly portable analyzer.
## HOW IT WORKS

1 **INSERT THE TEST CARTRIDGE INTO THE ANALYZER**

2 **COLLECT THE ORAL FLUID SAMPLE**

3 **INSERT THE COLLECTION DEVICE INTO THE TEST CARTRIDGE**
